

Giraffe Growth Chart T-8176

★ Featured Display: Find and Measure

This fine fellow has a very long neck for tracking growing kids! Display the Giraffe Growth Chart to measure your students every few months and to show them how they measure up to some very wild animals. Keep track of their heights on the chart that comes with the set. In between student growth checks, use this display to encourage kids to do some measuring of their own. After you introduce the basics of taking measurements, display some classroom items for your students to find, measure, and record. Use picture flash cards as shown, or take your own photos and display new ones often. Kids will have fun going on a measurement safari each week!
