

Frog Pond Number Line T-8211

★ Featured Display: Math Match-up

This fun learning game gets kids on their feet and practicing math skills! Display the number line as shown. Depending on skill levels, this game can be played with up to ten strips (1-100). Use accents and trimmer strips for scorekeeping. Create an "Answer Wand" by cutting a hole in a lily pad accent and attaching it to a painted dowel or ruler. Players use this wand to show their answers. To begin, divide your class into two teams, A and B. Give the wand to the first player on Team A. Draw a flash card from your deck and ask the player to solve it. He or she uses the wand to show their answer. A correct answer earns a point. Add a frog marker to the scoreboard for each point. Continue by taking one turn for each side, until all students have had a chance to play. Add up the scores...the team with the most points is the winner!

★ You'll need
