

Reduce, Reuse, Recycle

Set up a recycling relay game display that gets students thinking about the many ways to recycle.

Track weekly classroom activities with a calendar and have students track their home activities with progress charts.

Featured Display

Create an interactive display with ongoing uses. Set the scene with fadeless paper and trimmers. Attach the four 3-D recycling bins to the bulletin board with double-stick tape. Use these to play a relay race game (instructions are in the Bulletin Board Set Discovery Guide). Add the poster, student drawings, and reports throughout the year. Use a weekly calendar to post environmental activities. Students model the recycling practices at home and track their accomplishments on progress charts.
